

# Petrol Injector Cleaner

## Fuel Additive

Issued: April 2017

PRODUCT CODE	PACK SIZE	CTN / QTY
ADPIC375	375ml	6
ADPIC020	20 Litre	1

## Description

**Petrol Injector Cleaner** is a unique multi-purpose petrol fuel treatment designed to clean and protect fuel injectors and carburetors in one tank of fuel. Its synthetic detergents and surface active friction modifier effectively clean and lubricate the whole fuel delivery system including injectors and fuel pumps and extend the life of the fuel system components. It makes starting easier, provides for smoother idling, improves fuel economy by up to 2.4% on unleaded & E10 fuel, lowers emissions and can increase engine power by up to 2.6%.

## Application

**Petrol Injector Cleaner** is designed for use in all petrol engined passenger cars, 4WDs, light & heavy duty commercial vehicles, motor cycles, marine and stationary engines.

**Petrol Injector Cleaner** is suitable for use on all types of petrol injection including direct Injection as well as for engines fitted with carburetors. It reduces intake valve deposits allowing optimum air fuel mixture and increases combustion efficiency resulting in improved power output. It also protects the fuel system against rust and corrosion especially in systems using ethanol fuel blends such as E10. The active surface friction modifier helps lubricate and reduce friction inside the cylinder between the walls and the piston to further enhance fuel economy and performance.

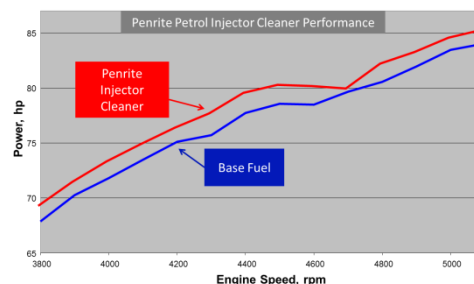

**Petrol Injector Cleaner** is suitable for unleaded petrol / LPG (Dual Fuel) and E10. It is not suitable for E85 or E100 fuels. It is safe for use with catalytic converters and oxygen sensors.

## For best results:

- Add prior to filling the fuel tank
- If fuel injectors are excessively blocked or fouled, use two bottles (2 x 375ml) for up to 60 litres of fuel. This will provide rapid clean up and restoration of performance
- For regular fuel system maintenance use at the rate of one bottle (1 x 375ml) for up to 60 litres of fuel, every 2500 - 3000km.
- Over treatment will not cause damage
- Please Note: If your vehicle is fitted with a "Capless" Fuel Filler system, we recommend using the vehicles emergency fuel filling funnel when adding this product to the fuel tank.

## Product Benefits

- Fuel economy gains of up to 2.4%
- Cleans blocked fuel injectors & carburetors in one tank
- Increases engine power by up to 2.6%
- Easier starting & smoother idling
- Reduces intake valve deposits
- Protects fuel system against rust & corrosion
- Reduces exhaust emissions
- Increases combustion efficiency
- Can be used in vehicles on dual fuel, such as petrol & LPG
- Is designed for all Unleaded and E10 fuel
- Synthetic detergents to keep system clean
- Removes contaminants minimising the negative impacts on the combustion process
- Safe for catalytic converters & oxygen sensors
- Economical – 1 bottle every 2,500 to 3,000 Kilometres

## Typical Data

Colour  
Flash Point

Red/Orange  
67 °C

Information in this sheet is based on recent production. Minor variations to typical properties are expected in normal manufacture and do not affect product performance. An MSDS is available on request.
