

WHEEL CLEANER

Steel & Alloy Wheel Rim Cleaner

Issue: November 2015

Product Code	Pack Size	Carton Qty
CCWC0005	500ml	6
CCWC005	5 Litre	4

Description

Wheel Rim Cleaner is a special acid free cleaner that rapidly and effectively removes stubborn dirt such as burned-in brake dust, oil & rubber residue as well as other road dirt on steel and alloy wheel rims. The gentle formulation does not affect rims, wheel nuts and bolts and is safe with ABS sensors. It is ideal for the perfect finish on all wheel types.

Application

Wheel Rim Cleaner is a powerful rim cleaner for regular wheel rim maintenance on alloy, steel or chrome wheels. It can also be used to clean painted or powder coated wheels.

Wheel Rim Cleaner when sprayed onto a wheel changes colour from clear to red, indicating the activation of the product when in use. It gets into all of the nooks and crannies of the wheel, lifting the grime and making the cleaning of the wheel easy, even in circumstances where dirt & road grime is baked onto the wheel.

Wheel Rim Cleaner is an aqueous neutral cleaner with anionic surfactants and sequestrates. The unusual scent of the product is typical.

Instructions for use:

- Set nozzle to spray position
- Spray onto the wheel rims from a close distance
- Leave to work for 3 to 5 minutes, the colour will change to red as the product activates
- Clean particularly heavy dirt with a soft brush
- Finally, rinse with a strong water jet or a special high-pressure spray

Please note: Do not apply in direct sun or on hot wheels and do not allow to dry on wheel surface.

Product Benefits

- Cleans and helps protect wheel rims
- Acid free formulation
- Removes stubborn stains, such as rust, brake residue and road grime
- Highly effective formulation cleans all types of wheels
- Safe with ABS sensors

Typical Data

Appearance	opaque liquid
Density	1.07 - 1.9 g/ml
Viscosity	13 – 20 s (Ford cup 4mm)
pH	6.5 – 7.5

Information in this sheet is based on recent production. Minor variations to typical properties are expected in normal manufacture and do not affect product performance. An MSDS is available on request.
