PRO GEAR Transmission & Differential Oils

Issue: December 2017

Penrite's **PRO GEAR** range of automotive gear oils are manufactured utilising a special combination of synthetic and mineral base oils, with an advanced additive system to provide performance and protection under the most severe service. Pro Gear oils are suitable for manual gearboxes, transaxles, transfer cases and differentials.

PRO GEAR differential fluids GL-5 75W-85, 75W-90 and 80W-140 contain Limited Slip Differential Additive so no further additive is needed when using in LSD differentials.

FACTORY RACING – The PRO GEAR range is used by Factory and Independent Race teams reliant upon the performance and protection it provides. As used in the 2017 Bathurst 1000 Winning Erebus V8 Supercar.

3. Pro Gear – Full Synthetic & Racing
