## GHS7 Hazardous, Non-Dangerous Goods

**P501** Dispose of contents/ container in accordance with local regulations.  
**Note**

**IMPORTANT** This SDS and the Hazard Classifications contained therein, only apply to the product in its concentrated form, as supplied.  
When diluted with clean water to 1:3 or greater they no longer apply.  
However, good hygiene and housekeeping practices should be adhered to.

### SECTION 3 – COMPOSITION AND INFORMATION ON INGREDIENTS

Ingredients:	CAS Number:	Proportion:
Ethylene glycol monobutyl ether	111-76-2	< 10 % w/w

Ingredients determined to be non-hazardous at concentrations present.	various	Balance

**NOTE:** Ingredients determined not to be hazardous are present in concentrations that do not exceed the relevant cut-off concentrations as found from NOHSC publication “List of Designated Hazardous Substances” or have been found NOT to meet the criteria of a hazardous substance as defined in the NOHSC publication “Approved Criteria for Classifying Hazardous Substances”, or have been found NOT to meet the criteria of a dangerous substance as defined in the GLOBALLY HARMONIZED SYSTEM OF CLASSIFICATION AND LABELLING OF CHEMICALS (GHS).

### SECTION 4 – FIRST AID MEASURES

**Scheduled Poisons** Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons. (Phone Australia 131126 or New Zealand 0800 764 766).

#### First Aid Facilities Required

No special requirements.

**Inhalation** Remove victim to fresh air away from exposure. Obtain medical attention if symptoms occur.

**Skin contact** Wash skin with plenty of water. Seek medical advice (e.g. doctor) if irritation, burning or redness develops. Seek medical advice (e.g. doctor).

**Eye contact** If in eyes, hold eyelids apart and flush the eyes continuously with running water. Remove contact lenses. Continue flushing until advised to stop by the Poisons Information Centre or a doctor, or for at least 15 minutes. If eye irritation persists: Get medical advice/attention.

**Ingestion** Do NOT induce vomiting. Do NOT attempt to give anything by mouth to an unconscious person. Rinse mouth thoroughly with water immediately. Give water to drink. If vomiting occurs, give further water to achieve effective dilution. Seek urgent medical advice (e.g. doctor).

**Advice to Doctor** Treat symptomatically. All treatments should be based on observed signs and symptoms of distress of the patient. Poisons Information Centre in each Australian State capital city or in Christchurch, New Zealand can provide additional assistance for scheduled poisons.

### SECTION 5 – FIRE FIGHTING MEASURES

**Fire and Explosion Hazards** C1 combustible, but does not support combustion.

**Extinguishing Media** Use water spray, alcohol resistant foam, dry chemicals or carbon dioxide to extinguish.

**Fire Fighting** Keep containers exposed to extreme heat cool with water spray. Fire fighters to wear self-contained breathing apparatus if risk of exposure to products of combustion or decomposition.

**Flash Point** ~63 °C.

### SECTION 6 – ACCIDENTAL RELEASE MEASURES

<b>Emergency Procedures</b>	Shut off engine and electrical equipment and leave off. No smoking or naked lights within 50 metres. Move people from immediate area; keep upwind. Wear appropriate personal protective equipment and clothing to prevent exposure. Stop leak if safe to do so. Send messenger to notify fire brigade and police. Tell them location, material quantity, emergency contact. Indicate condition of vehicle and damage or injuries observed. Warn other traffic.
<b>Occupational Release</b>	Minor spills do not normally need any special clean-up measures. Rinse with water. In the event of a major spill, prevent spillage from entering drains or water courses. Wear appropriate protective equipment as in section 8 below to prevent skin and eye contamination. Spilt material may result in a slip hazard and should be absorbed into dry, inert material (e.g. sand, earth or vermiculite), which then can be put into appropriately labelled drums for disposal by an approved agent according to local conditions. Residual deposits will remain slippery. Wash area down with excess water. If contamination of sewers or waterways has occurred advise the local emergency services. In the event of a large spillage notify the local environment protection authority or emergency services.

### SECTION 7 – HANDLING AND STORAGE

<b>Handling</b>	As with any chemical, avoid excessive personal contact. Wear protective clothing when risk of exposure occurs. Avoid contact with incompatible materials. When handling, DO NOT eat, drink or smoke. Keep containers closed at all times. Avoid physical damage to containers. Always wash hands with water after handling. Work clothes should be laundered. Launder contaminated clothing before re-use.
<b>Storage</b>	Store in a cool, dry, place with good ventilation. Avoid storing in aluminium and light alloy containers. Store away from acids. Keep containers closed at all times – check regularly for leaks

### SECTION 8 – EXPOSURE CONTROLS AND PERSONAL PROTECTION

<b>Control parameters</b>	
<b>Occupational Exposure Limits</b>	National Occupational Exposure Limits, as published by National Occupational Health & Safety Commission: Time-weighted Average (TWA): None established for product. <b>For ingredients:</b> <ul style="list-style-type: none"><li>• <b>Ethanol: 1000ppm 1880mg/m3</b></li><li>• <b>Ethylene glycol monobutyl ether: 20ppm, (96.9 mg/m3)</b></li></ul> Short Term Exposure Limit (STEL): None established for product. <b>For ingredient:</b> <ul style="list-style-type: none"><li>• <b>Ethylene glycol monobutyl ether: 50 ppm, (242 mg/m3)</b></li></ul>
<b>Control parameters</b>	
<b>Biological Limits</b>	No biological limits allocated.
<b>PERSONAL PROTECTION PPE</b>	
<b>Ventilation</b>	Use only in a well-ventilated area. Ensure ventilation is adequate to maintain air concentrations below exposure standards.

### Personal Protective Equipment

Use good occupational work practice.

The use of protective clothing and equipment depends upon the degree and nature of exposure. Final choice of appropriate protection will vary according to individual circumstances i.e. methods of handling or engineering controls and according to risk assessments undertaken.

The following protective equipment should be available;

### Eye Protection

Not required for normal cleaning operations as per label directions.

The use of safety glasses with side shield protection, goggles or face shield is recommended to handle in quantity, cleaning up spills, decanting, etc. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.

### Skin Protection

Not required for normal cleaning operations as per label directions.

Overalls, apron, work boots and elbow length gloves are recommended for handling the concentrated product (as per AS/NZS 2161, or as recommended by supplier) to handle in quantity, cleaning up spills, decanting, etc.

### Protective Material Types

Material suitable for detergent contact – Butyl rubber, Natural Latex, Neoprene, PVC, and Nitrile.

### Respirator

Not required for normal cleaning operations with adequate ventilation.

If engineering controls are not effective in controlling airborne exposure then an approved respirator with a replaceable dust/particulate filter should be used. Refer to relevant regulations for further information concerning respiratory protective requirements. Reference should be made to Australian Standards AS/NZS 1715, Selection, Use and Maintenance of Respiratory Protective Devices; and AS/NZS 1716, Respiratory Protective Devices, in order to make any necessary changes for individual circumstances.
