CRYSTAL CLEAR ADBLUE ADDITIVE

Last updated: 19/10/2026 3:53 pm

PRODUCT CODE	PACK SIZE	CARTON QTY
ADCC250	250mL	6

PRODUCT BENEFITS

Crystal Clear Adblue® Additive is a specially formulated solution designed to prevent and clean crystallisation deposits in Selective Catalytic Reduction (SCR) systems. These deposits are typically formed from dried urea residues, which can impair the dosing performance, clog the injectors, and reduce overall emissions efficiency.

Crystal Clear Adblue® Additive improves system reliability, extends component lifespan, and supports optimal NOx reduction performance.

APPLICATION

Crystal Clear Adblue® Additive is suitable for use in all diesel vehicles equipped with Selective Catalytic Reduction (SCR) systems. It is designed to help prevent and reduce crystallisation build-up within SCR systems, maintaining efficient system operation and reducing the risk of AdBlue®-related deposits.

INSTRUCTIONS FOR USE:

- Recommended dosage: 25mL of additive to 10L of AdBlue.
- Add directly to the AdBlue tank prior to refilling.

For heavily crystallised systems, manual cleaning may be required in addition to treatment.

PLEASE NOTE: DO NOT add to fuel or fuel tank. Pour into Diesel Exhaust Fluid Reservoir only.

PRODUCT BENEFITS

- Prevents the formation of urea crystals in SCR systems
- Cleans existing deposits from AdBlue® tank, pump, injectors and lines
- Enhances AdBlue® fluid stability and performance
- Reduces maintenance, downtime and help avoid the costly repairs of the SCR system
- Improves the operation of the SCR system
- Compatible with all standard AdBlue® (ISO 22241 compliant) fluids
- Safe for use on painted surfaces, plastics and coated components
