P26 MASS AIR FLOW SENSOR CLEANER

Last updated: 27/02/2025 8:27 am

PRODUCT CODE	PACK SIZE	CARTON QTY
P26MAF0002	200mL	6

PRODUCT BENEFITS

P26 Mass Air Flow Sensor Cleaner is a specially formulated solvent cleaner for fast and gentle cleaning of sensitive components of the MAF (mass air flow) in petrol and diesel engines. The active solvents offer fast evaporation that is free of residues to dissolve dust, dirt, and other contaminants.

APPLICATION

P26 Mass Air Flow Sensor Cleaner is suitable for the cleaning of all components of the MAF sensor. Cleaning of the mass air flow sensor will result in starting and idling properties of the vehicle being restored, the engine performance increased and the fuel economy restored. It's also suitable for use in petrol and diesel engines.

INSTRUCTIONS FOR USE:

1. Ensure the vehicle is not running before using the product
2. Disconnect the electrical connection of the air flow sensor and remove the sensor from the vehicle.
3. Spray generously onto dirty components and allow the dirt to drip off. Repeat the process until the sensor is clean
4. Do not touch the sensitive components of the sensor
5. Allow the solvent to dry completely before installing the MAF sensor

Application is recommended every time the air filter is replaced or when problems arise.

NOTE: Before using on plastics that are sensitive to solvents, especially on mechanically loaded parts, test for compatibility.

PRODUCT BENEFITS

- Professional Strength formulation
- Safe on all types of sensors
- Fast-acting, quick-drying formula free of residue
- Cleans parts without the need for dismantling
- Restores engine performance and fuel economy
- Easy aerosol application
