## PRO SERIES DIESEL FUEL BOOST +

Last updated: 28/09/2022 5:04 pm

PRODUCT CODE	PACK SIZE	CARTON QTY
PSDFB0005	500ml	6

### PRODUCT BENEFITS

**Diesel Fuel Boost +** is a fuel treatment designed to enhance the cetane rating of regular diesel fuel. It improves the combustibility of diesel fuel providing increased power, smoother running, easier starting and better fuel economy.

### APPLICATION

**Diesel Fuel Boost +** is designed for use in all diesel engines in passenger cars, 4WD's, light and heavy commercial vehicles, motorcycle/UTV/ATV, marine, agricultural, mining and stationary engines. It can also be used in competition vehicles to enhance performance.

**Diesel Fuel Boost +** will readily mix with diesel fuels up to and including Biodiesel 10 (B10). It provides up to a 6 cetane number increase depending on the quality of the diesel pump fuel. The increase in cetane rating will vary between different grades of diesel. The higher the quality of the fuel, the more significant the improvement. The cetane increase improves the combustibility of the diesel fuel by helping it burn more efficiently and completely.

**Diesel Fuel Boost+** reduces ignition delay which can cause knocking and noise, misfiring, increased fuel consumption, poor start up and reduced engine performance. It provides lower regulated emissions such as particulates, hydrocarbons and carbon monoxide. It has excellent water separation properties and provides protection against corrosion and injector sticking as well as improving cold flow performance by reducing the cold filter plugging point (CFPP) for use in colder climates.

### FOR BEST RESULTS

- Add prior to filling fuel tank
- Add one bottle (500ml) to fuel tank. One bottle treats up to 100 Litres of diesel.
- Use regularly for maximum benefit

**Please Note:** If your vehicle is fitted with a "Capless" Fuel Filler system, we recommend using the vehicles emergency fuel filling funnel when adding this product to the fuel tank.

### PRODUCT BENEFITS

- Increases cetane number by up to 6
- Restores power & acceleration
- Enhances fuel economy by up to 2.1% following treatment
- Lowers emissions and exhaust particulate matter
- Reduces ignition delay for smoother running, easier cold starting & smoother idling
- Improves cold flow performance
- Suitable for all types of diesel fuels
- Reduces engine wear by lowering peak pressure in the cylinder
- Suitable for diesel fuels including Biodiesel 10 (B10)
- Suitable for on/off road and competition applications

### PRODUCT PERFORMANCE LEVELS

#### TYPICAL DATA

Colour	Amber
Density at 15°C, kg/L	0.87
Flash Point, °C	61.5
